Contact: +91 7019818045

Objective:

To leverage my technical expertise in a dynamic environment, delivering effective solutions while contributing to organizational goals and advancing my career as a software professional.

Professional Summary:

- ❖ 4+ years of experience in business applications, including 3.5+ years specializing in big data with Hadoop, focusing on data migration and integration
- ❖ Extensive experience with Hadoop ecosystem technologies including HDFS, Hive, Sqoop, Spark, AWS, Azure, and Fabric
- ❖ Strong hands-on experience in data storage, querying, and processing, including implementing Spark jobs on AWS EMR and Azure Databricks
- ❖ Proven track record in processing large datasets and optimizing Spark and Hive queries for cost efficiency
- ❖ Expert in handling various file formats (JSON, XML, AVRO) and designing robust data ingestion pipelines and architectures
- ❖ Demonstrated problem-solving abilities with strong analytical and communication skills
- ❖ Proficient in implementing CI/CD pipelines and automated testing frameworks

Educational Qualification:

- ❖ B. Tech in Computer Science Engineering from R.V College of Engineering, Bengaluru (2017-2021) – 9.15 CGPA.

Employment History:

- ❖ **Specialist Software Engineer**, Société Générale Global Solution Center, Bengaluru — *Jan 2025 to Present*
- ❖ **Senior Software Engineer**, Bosch Global Software Technologies Private Limited, Bengaluru — *Jan 2022 to Jan 2025*
- ❖ **Associate Software Engineer**, Torrey Harris Business Solutions, Bengaluru — *Aug 2021 to Dec 2021*

Professional Experience:

Société Générale Global Solution Center

Role: Specialist Software Engineer (Data Engineering)

Technologies: Spark, Azure Databricks, Azure Data Factory, Azure Synapse Analytics

Duration: Jan 2025 – Present

Responsibilities:

- ❖ Working on building a scalable data pipeline using **Azure Databricks** and **Azure Data Factory**.
- ❖ Integrating and transforming large datasets within **Azure Synapse Analytics** for reporting and analysis.
- ❖ Collaborating closely with **business stakeholders** to gather requirements and deliver data-driven solutions.
- ❖ Ensuring best practices in **cloud-based data engineering** and pipeline optimization.

Bosch Global Software Technologies Private Limited

Role: Data Engineer

Technologies: Spark, Scala, Python, HDFS, Hive, AWS

Duration: Jan 2022 – Present

Responsibilities:

- ❖ Performed data transformations using **Scala Spark** and **PySpark** for faster data processing.
- ❖ Developed **real-time streaming** applications using **Spark Structured Streaming** integrated with **Apache Kafka** for efficient ingestion and processing of manufacturing data.
- ❖ Implemented CICD with **Python, Docker, Jenkins and Airflow** for automated testing and deployment.
- ❖ Developed **dynamic DAGs** in **Apache Airflow** for automating workflows and managing dependencies across data pipelines.
- ❖ Designed Airflow DAGs with **task retries, scheduling, and alerting** to handle failures and ensure timely task execution.
- ❖ Used **Kafka Streams** library to build **Kafka** based applications which require very low latency and huge number of stateful transformations.
- ❖ Created a Scala Spark based application which would manage the small files issue created by spark by performing **Coalescing** and **Partitioning** on Hadoop data.

Deputy Synthes Chemical (Client → Johnson & Johnson)

Role: AWS Cloud Spark Developer

Technologies: Spark, Scala, Python, HDFS, Hive, AWS

Duration: Aug 2021 – Dec 2021

Responsibilities:

- ❖ Set up and managed EC2 and EMR clusters.
- ❖ Loaded data into Hive using Spark and optimized Spark SQL queries.
- ❖ Performed data transformations using Scala and Spark for faster data processing.
- ❖ Implemented Hive partitioning and bucketing for efficient data access.
- ❖ Exported and imported data between HDFS and RDBMS using Sqoop.

Skill Profile:

- ❖ **Big Data Ecosystem** : Spark, Hadoop, Hive, AWS, Azure, Kafka, Solace, Iceberg
- ❖ **Databases** : MySQL, SQL Server
- ❖ **Languages** : Scala, Python, SQL, Spark SQL, HiveQL
- ❖ **Cloud Platforms** : AWS, Microsoft Azure and Microsoft Fabric
- ❖ **Operating Systems** : Linux, Windows
- ❖ **Version Controlling System** : Bit-Bucket, GitHub
- ❖ **Other tools/platforms** : IntelliJ, Putty, PyCharm, Airflow, Jenkins, Docker, WebHDFS,

Livy REST API, Flake8, Pylint, pytest, Github Actions and ArgoCD

Awards & Certifications:

- ❖ Recognized as Best Team Member for 8 months.
- ❖ Received Spotlight awards for 3 consecutive quarters.
- ❖ Microsoft Azure Data Engineer Certified (March 2025) [See Credential](#)
- ❖ Microsoft Fabric Data Engineer Certified (April 2025) [See Credential](#)
