

RASIKA KHAPATE

Front End Developer

📞 9108763870 @rasikakhapate@gmail.com 🔗 <https://www.linkedin.com/in/rasika-khapate/> 📍 Hyderabad

SUMMARY

Software Developer with 3+ years of experience in building **scalable, high-performance SPAs using React.js, JavaScript (ES6+), and Redux**. Skilled in state management, API integration, and **UI optimization with a focus on performance, security, and clean, maintainable code**. Experienced in Agile development, Git, and CI/CD workflows for efficient, reliable deployments.

EXPERIENCE

Front End Software Engineer

Accenture 📅 12/2023 - Present

- **Developed and maintained high-performance Single Page Applications (SPAs)** using React.js, JavaScript (ES6+), and Redux, improving user experience by 40%.
- **Transformed a legacy static website into a modern, high-performance React.js-based application**, reducing load times by 50% and significantly enhancing user retention.
- **Optimized front-end performance using lazy loading, code splitting**, and server-side rendering (SSR), reducing initial load time by 45% and improving SEO rankings.
- **Managed version control using Git** alongside VS Code, **reducing deployment errors by 35%** through well-maintained branches, code reviews, and CI/CD pipeline integration.

Associate Software Engineer

Accenture 📅 11/2021 - 12/2023

- Worked as part of Core Engineering Team. My responsibilities included designing, building and configuring applications to meet business requirements.
- Experienced in troubleshooting React application issues by **debugging the source code**. This involved a deep understanding of the application's functionality and ability to identify and resolve issues efficiently.
- Played a key role in **identifying the root cause** and **implement solutions for 15+ problem records** of React application issues.
- **Executed SQL queries** to retrieve and rectify data within MySQL databases, ensuring **data integrity and accuracy**.

SKILLS

TECHNICAL SKILLS

HTML5, CSS3, JavaScript (ES6+), React.js, React Hooks, Redux (State Management), Tailwind CSS, TypeScript, Git, MySQL, Linux, Java, ServiceNow, Jira, Confluence

PERSONAL SKILLS

Communication, Problem Solving, Adaptability, Team Collaboration, Client Relations

EDUCATION

Bachelors in Electronics and Communication Engineering

PDA College of Engineering

📅 2017 - 2021 📍 Gulbarga, India

CGPA
7.84 / 10

Secondary Education in Science

Sarvajna PU College of Science

📅 2015 - 2017 📍 Gulbarga, India

Percentage
84.4 / 100

PROJECTS

ViewTube

🔗 <https://github.com/rasika-khapate/ViewTube>

A YouTube-like video streaming app built with **React, Redux, JavaScript, HTML, and TailwindCSS**, featuring sidebar navigation, category filtering, live chat, and threaded comments.

- **Developed a YouTube-like video streaming platform** using modular React components for video playback, navigation, live interaction, and UI flow, closely replicating real-world streaming workflows.
- **Implemented interactive features** including a live chat simulation with real-time message rendering and a nested, threaded comment system designed with reusable components and structured data flow.
- **Architected scalable state management** using Redux Toolkit with multiple slices, utility modules, and a clean component-based structure to ensure maintainability and separation of concerns.
- **Demo Link** - <https://viewtube-v.netlify.app/>

DineDash

🔗 <https://github.com/rasika-khapate/DineDash>

A food delivery web app built with **React, Redux, JavaScript, HTML, TailwindCSS, and Parcel**, featuring restaurant listings and cart management with optimized state handling.

- **Built a React-based food delivery web application** featuring restaurant search, top-rated filtering, detailed menu views, and structured navigation for a smooth browsing experience.
- **Implemented scalable state management using Redux** to handle cart operations and shared data efficiently, along with Parcel bundler for faster builds and optimized performance.
- **Enhanced user experience with advanced React patterns** by **adding routing**, online/offline detection, and a **Higher Order Component (HOC)** to visually highlight vegetarian restaurants.
- **Demo Link** - <https://dinedash-d.netlify.app/>

StreamFlix

🔗 <https://github.com/rasika-khapate/StreamFlix>

An AI-powered Netflix clone built with **React, Redux, JavaScript (ES6+), Tailwind CSS, Firebase, OpenAI API, and TMDB API**, featuring authentication and GPT-based movie recommendations.

- **Developed a full-stack Netflix-inspired streaming platform** with secure authentication, **sign-up/sign-in workflows**, and **real-time routing** using Firebase Auth and React Router.
- **Integrated TMDB API with Redux Toolkit** to fetch and manage movies, trailers, and categorized lists through dynamic, reusable UI components.
- **Implemented AI-powered movie recommendations using the OpenAI GPT API with multilingual search**, and built a scalable, responsive interface using Tailwind CSS for performance and maintainability.
- **Demo Link** - <https://streamflix-2037b.web.app/>
